

To whom it may concern:

Please reject the National Association of Broadcasters' petition 04-160 that would stop XM Radio from being able to provide me with the local traffic and weather information that I need for my daily commute. I do not feel it is fair for one group to attempt to keep another group from selling the same services. I believe the local stations should try to win back their listeners by providing better quality entertainment rather than keeping other companies from providing it.

Thank you for your time.  
Rick Ballard
